Nuclear Fit

Formation Document

Who we are: We are Nuclear Fit LLC, a for-profit company with the goal of creating customized pre-workout products for everyone.

The problem we tackle: Generic pre-workouts don't always work for everyone equally. Pre-workout formulas already out on the market can work for some but also have little to no effect on others.

What solutions we provide: We formulate personalized pre-workout products for optimal performance and taste for each individual. Our products include powders, gum, bars, etc.

Company executives: Our CEO is Colin Speer.
Our CFO is Khalil Foulane.
Our CTO is C.J. Awunti.

What the competition fails to do: Our competition creates pre-workout in a one size fits all for those looking for an extra boost in the gym. This may leave some boxes unchecked as everyone responds uniquely to ingredients and flavors. This leaves people guessing and checking multiple products spending countless dollars trying to find the perfect one for them.
